PATIENT CARE

encompass

ENCOMPASS. FIRST IN SAFETY AND COMFORT.

From coordinated apparel and comforting textiles, to innovative patient care solutions that drive compliance and improve patient outcomes, we partner with our valued customers to create warm, welcoming and healing environments.

For nearly a century, Encompass has been helping health care and hospitality organizations create safe, comfortable environments for patients, staff, residents and guests.

Whether developing advanced technologies for the prevention of hypothermia and deep vein thrombosis, helping hospitals reduce the spread of infections, or designing interiors for new, state-of-the-art retirement communities, we offer a complete line of products, services and education programs that meet the challenges our customers face every day.

encompass

We're focused on prevention so you can focus on care.

Research shows a strong link between physical environments and quality of care. By providing clinically proven products and services that prevent a number of serious conditions, Encompass works with you to achieve significant and quantifiable improvements in care.

ACUTE CARE

With our superior line of products and services, you can create a comfortable, protective and healing environment for patients, residents, staff and visitors. Soft and attractive linens and apparel, non-slip footwear, fluffy pillows, hypothermia-prevention products, clinically differentiated DVT prevention products and best-performing therapeutic support surfaces are just a few reasons why advanced acute care facilities across the nation have come to depend on us.

Our focus also goes well beyond just prevention. We also provide the tools and information you need to make more informed decisions about the products you use. Our commitment to clinical education is a key value-added benefit we provide to empower your organization to have fewer preventable events, reduce costs and—most importantly—keep your patients and staff comfortable and safe.

MAKE NON-COVERED CONDITIONS A NON-ISSUE.

Recently, the Centers for Medicare and Medicaid Services (CMS) announced they would no longer reimburse for a wide range of preventable conditions that are not present upon admission. These hospital acquired conditions currently include patient falls and deep vein thrombosis in some circumstances. Additionally, they are looking to expand the list as time goes on. We provide the products you need to help prevent these non-reimbursable challenges from happening in the first place. The end result— improved clinical outcomes and a dramatic decrease in costs.

HEALTH CARE-ASSOCIATED INFECTIONS (HAIs)

HAIs are the fourth largest killer in America and add an estimated $30.5 billion to the nation's hospital costs annually. Clinically-based evidence demonstrates life-threatening surgical-site infections could be reduced by as much as two-thirds by utilizing simple hypothermia prevention measures such as Thermoflect® heat reflective technology.

thermoflect®
Heat Reflective Technology

DEEP VEIN THROMBOSIS (DVT)

DVT is the primary contributor to the development of pulmonary embolisms (PE). PE is the third most common cause of death and reportedly the number one preventable hospital acquired condition. CMS reported $7.13 billion was spent in fiscal year 2007 for the treatment of DVT. This staggering number earned DVT a prominent position on the CMS Hospital Acquired Conditions list for fiscal year 2009.

Effective prevention requires superior products and a commitment to clinical education. Our StarSystem™ family of DVT prevention products includes feature-rich solutions for clinicians focused on the best possible outcome for all patients.

starsystem®

PATIENT FALLS

In hospitals, falls consistently make up the largest single category of reported incidents. The morbidity, mortality and financial burdens attributed to patient falls in hospitals and other healthcare settings are among the most serious risk management issues facing the healthcare industry with an estimated $20 billion spent annually to treat fall injuries.

As the established market share leader, we have the most comprehensive patient safety footwear offering available including: high visibility risk management, eco-friendly recycled yarns, single tread, double tread, all-around tread and fashion styles.

albahealth®

CLINICAL EDUCATION AND CONSULTING

In an age of rising health care costs, our clinical resource experts can help you promote the well-being of everyone in your care, and stay true to your bottom line. Along with our Smart Solutions℠ clinical education tools, product implementation programs and cost management consulting services, we offer the tools and resources you need to educate your staff, evaluate product use, reduce costs, improve care and create healthier environments.

Smart Solutions℠ for Linen Use

PROVIDING INNOVATIVE, SOLUTION-FOCUSED PRODUCTS

Clinical, therapeutic and limited-use health care prevention and comfort products

We are honored to be a market leader in disposable and limited-use healthcare products, and are proud they promote healing through comfort, safety and compliance. We have a robust product development program that continually introduces exciting breakthroughs in product design, quality improvement, manufacturing efficiency and productivity.

Table of Contents

encompass

NxSTAR DVT Prevention System

Risk Management

Effective risk management protocols are built on three key elements:
- Safety — products that provide enhanced safety measures
- Comfort — products designed to address the comfort of the patient without sacrificing efficacy
- Compliance — products with features that drive compliance

SAFETY
Innovative safety features are found throughout the Encompass product offering. Some highlights include: Thermoflect® Hypothermia Prevention Products which effectively warm patients without the use of electricity, NxSTAR® DVT Prevention System with pre-set optimum therapeutic pressure to insure precise, consistent therapy and Patient Safety Footwear tread with superior coefficient of friction to provide better patient protection from falls.

COMFORT
Even the best environments can seem uncomfortable when undergoing medical treatment. Quality and comfort communicate we care. Our entire risk management offering is latex-free and manufactured with the highest quality materials to insure maximum comfort. The patent pending Rightway® System found in our UltraCARE™ Anti-Embolism Stockings provides superior comfort through better fit and significantly reduces the likelihood of skin breakdown.

COMPLIANCE
We perceive compliance as the ultimate compliment. Clinicians have used our products for over 25 years with exceptional patient compliance. Our robust product development process incorporates nationwide clinician and patient input into every product design. The result is the easiest to use and most comfortable products available today that effectively drive compliance.

Alignment Indicator ✕ ✕ Two-way Stretch Fabric

Rightway Ankle Crest ✕ ✕ **Rightway Heel Guides**

✕ **Rightway Heel Pouch**

Inspection Port ✕

Rightway® System

The Rightway System was designed to combine superior fit and ease of application through three proprietary design features:

RIGHTWAY ANKLE CREST
• Ribbed for comfort
• Reduces excess material
• Prevents skin shearing

RIGHTWAY HEEL
• Oversized heel pouch
• Assists proper placement
• Eases donning and doffing

RIGHTWAY HEEL GUIDES
• Assists proper positioning
• High visibility colors
• Easily identify proper sizing

KEY FEATURES FOR ALL ANTI-EMBOLISM STOCKINGS
• Alignment indicator aids proper positioning on leg front
• Color coded inspection port for easy size identification
• Outward facing seams reduce skin irritation and/or skin depressions as limb size changes
• Multiple sizes to insure proper fit
• Rapid moisture transfer moves fluids and body oils from skin to surface of the fabric quickly to speed drying, reduce bacteria and improve laundering
• Two-way stretch fabric provides easier application and conforms to various leg silhouettes
• Latex-free for sensitive skin
• Upgraded size standards meet the needs of a larger patient population
• Top inspection port provides convenient access to toes and top of foot; improves patient comfort to encourage ambulation
• No bind, roll resistant premium elastic top keeps stocking in place
• Comfort panel in thigh/waist reduces tourniquet effect and allows expansion for edema
• Adjustable waist strap for comfortable fit

Pre-Op

Intra-Op

PACU

thermoflect®
Heat Reflective Technology

THERMOFLECT® Hypothermia Prevention System

Thermoflect is a simple solution to hypothermia that utilizes NASA-pioneered science instead of electricity. The innovative Thermoflect products reflect a patient's endogenous radiant heat, banking it in the body's core, while preventing convective heat loss (wind chill).

USING THERMOFLECT IS AS EASY AS 1, 2, 3

Optimum hypothermia prevention must begin while the patient is warm before entry into the OR Suite — *Bank the Heat to Beat the Chill.*

1. Cover the patient as early as possible.
2. Cover the patient's maximum body surface area — tucking the material around the patient to help seal in the heat.
3. Maintain maximum coverage throughout all perioperative phases — Pre-Op, Intra-Op, PACU.

Thermoflect products are:
- Latex-free
- Nonconductive
- Meets:
  – 16 CFR Part 1610 Standard for Flammability of Clothing Textiles
  – 16 CFR Part 1615 Standard for the Flammability of Children's Sleepwear Sizes 0 through 6X
  – 16 CFR Part 1616 Standard for the Flammability of Children's Sleepwear Sizes 7 through 14
- Lined with a soft, patient-friendly inner surface.
- Cost-effective, ultra-lightweight yet durable, and move easily with the patient throughout the perioperative journey.
- Trusted. It has become a part of the US Military's Hypothermia Prevention Protocol.

MR **NOT FOR USE IN MRI**

Thermoflect products are not for use in MR environments.

Falls Prevention

Albahealth® understands your patient safety and fall prevention needs and has been the trusted partner of more healthcare facilities nationwide than any other patient safety footwear manufacturer for over 25 years.

Vibrant colors, larger tread surfaces and superior coefficient of friction ensure your patients at risk for falls are easily identified and safer every step of their stay.

We offer an extensive line of patient safety footwear and risk alert products for effortless implementation into falls intervention programs across the nation.

Breeze

Breathable Patient Positioner

Who is Breeze Patient Positioner for?
- Facilities dealing with staff injuries to arm/shoulder or back, as a result of repositioning patients/residents
- Personnel using bedpads to reposition patients/residents
- Patients/residents not fully benefiting from the desired effects of their pressure redistribution surfaces due to unnecessary layering of products
- Patients/residents requiring assistance with bed mobility
- Healthcare facilities with budgetary constraints

CAT #	DESCRIPTION	DIMENSIONS	WEIGHT
50000-PTD	Breeze Slider Sheet, Standard	40" x 72"	15.9 OZ
50000-PTDB	Breeze Slider Sheet, Bariatric	47" x 72"	20.4 OZ

FEATURES AND BENEFITS
- Quality 50/50 cotton/polyester twill surface provides patient comfort and reduces the risk of shearing friction
- Low-friction backing allows staff to reposition patients safely and easily
- Breathable taffeta backing avoids heat buildup under patients
- Generous sizing provides maximum support

Note: Breeze can be washed along with regular bed linens.

Load Force Test (Lab and Hospital Tested)

Objective: To determine the force required to initiate and continue moving a 200 lb object on a hospital bed using a fixed apparatus.

ITEM	Initiate Slide	%	Keep Sliding	%
Drawsheet	65.1 lbs	Base	50 lbs	Base
Underpad	45 lbs	-31%	30 lbs	-40%
Breeze	38.2 lbs	-41%	19 lbs	-62%
Competitor B	38.2 lbs	-41%	26 lbs	-48%
Competitor C	45 lbs	-31%	22 lbs	-56%

Conclusion: Breeze reduces the force required to move and continue moving a patient on a hospital bed by 62%, therefore reducing the overall strain on the caregiver.

Findings obtained from an independent laboratory study. Competitor names not available to the public.

Breathability

Reduces the risk of heat and moisture build-up under the patient, enhancing comfort.

GRAMS/SQUARE METER/24 HOURS

BREEZE

Minimum requirement for breathability

Moisture Vapor Transmission Rate (MVTR)
Moisture Vapor Penetration Rate (MVPR)
MVTR = 1136 g/m² - 24hrs
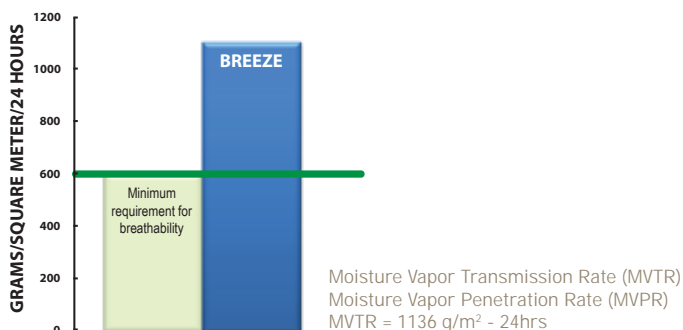

Pressure Mapping

Breeze's thin profile should not impair the performance of pressure redistribution mattress, and can therefore remain beneath patients, at all times — so it's always there when you need it.
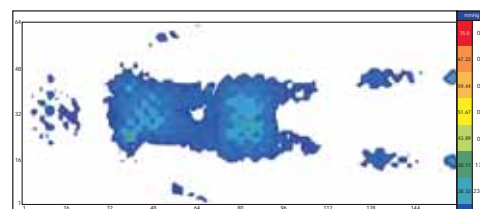

Without Breeze
Male, 68 years old, 6'10" tall, 190 lbs, back lie flat
Average pressure = 18.02 Peak pressure = 43.4
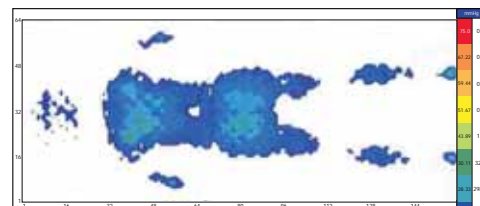

With Breeze
Male, 68 years old, 6'10" tall, 190 lbs, back lie flat
Average pressure = 18.84 Peak pressure = 44.95

Wound & Skin Care

Encompass understands maintaining skin integrity and proper wound care management is essential to infection prevention and shorter hospital stays. As a demonstrated market share leader with several patented technologies, we are committed to providing the highest quality latex-free products to improve comfort, promote compliance and insure the best possible outcome for all patients.

STOCKINETTE
The Albahealth® patented Speed-Roll® application system features convenient pull-tabs pre-rolled in the stockinette to reduce contact with patient extremity. They offer a wide array of sizes and configurations to address your entire stockinette needs.

DRESSINGS
Albahealth® offers a wide variety of options to address patient wound care needs including: Packing Strips, Permeable Non-Adhering and Petrolatum Gauze Dressings. Petrolatum Dressings are delivered in an innovative packaging for improved convenience and less mess. An oil-resistant paper wrap folded over the dressing protects it within the peel-open foil-lined pouch and greatly simplifies handling.

DRESSING RETAINERS
Albahealth® X-Span® technology offers greater fabric stretch to accommodate more uses and a marked reduction in lint. Dressing changes are easier, faster and more comfortable when using tubular dressing retainers. They hold wet or dry dressings in place without skin irritation that can be caused by tape.

WASHCLOTHS/CLEANERS
The Encompass family of disposable and limited-use washcloths and cleaners provide a cloth-like feel for delicate skin in styles from the Cubby Cleaners® for infants to Wash Pack® pre-moistened washcloths which are perfect for head to toe clean-up.

INCONTINENT PADS
Surface dryness is essential to maintaining skin integrity. Encompass offers a wide variety of synthetic-faced incontinent pads for improved wicking and moisture management. Their bonded construction offers the highest resistance to bunching and wrinkles, reducing the chance for shearing and excess pressure.

AVCOR COMPRESSION BANDAGES
The patented knit construction and elastomer design of their self-adhesive compression bandages provides controlled compression and ease of application eliminating the need for metal clips or tapes. These bandages securely adhere anywhere along the wrap and ensure desired compression.

NEW TECHNOLOGIES PROVIDE SUPERIOR ODOR AND MOISTURE MANAGEMENT

Albahealth's innovative blend of polyester and Cool-Wick™ with embedded anti-microbial yarns provides aggressive odor and moisture management.

Performance testing reveals this product absorbs 95% faster than untreated polyester which helps prevent bacteria and promote healthier skin.

Incontinent Care

PATIENT CARE INCONTINENT PADS

Moisture management is important to successful skin integrity in the acute care setting. Quality linens also have a factor in reducing the amount of bunching, pressure, shearing and friction to which patients are exposed.

Not all incontinent pads, whether reusable or disposable, perform the same. Incontinent pads were originally designed to protect the sheets and mattress rather than the patient. Many pads in use today still adhere to this historical design.

We are now more aware of the extent that excess moisture, bunching, pressure, shearing and friction from bed linens and related incontinent products can contribute to skin breakdown and discomfort. A well-designed incontinent pad, along with good nursing care, can help to mitigate all those negative influences.

Construction

Almost all underpads are constructed of a top or "facing" layer, a middle "soaker" layer, and a bottom "barrier" layer. Each has a job to do:

Facing — get moisture away from skin; provide soft, comfortable surface

Modern, all-polyester fabrics provide the softness that cotton does, but are designed to wick moisture from the top facing into the soaker level. For best patient care, we recommend a high-performing all-polyester facing, instead of one made from cotton fabric.

Soaker — attract, hold and disperse moisture over multiple voids

A good Patient Care pad will have a minimum of 35% Rayon, which is more effective at drawing the moisture into the soaker and quickly spreading it horizontally. Disposable incontinent pads generally use polymer gels to capture liquids. However, once activated, the gel usually cannot absorb or disperse more liquids on multiple voids like a reusable pad can.

Barrier — keep moisture inside pad; keep pad from slipping down the bed

The best Patient Care pads "bond" their barrier layer to the quilted facing and soaker levels. Bonding ensures that the pad will not bunch on itself, and also makes it more durable and wrinkle-free during the laundering process.

SURFACE

SOAKER

BARRIER
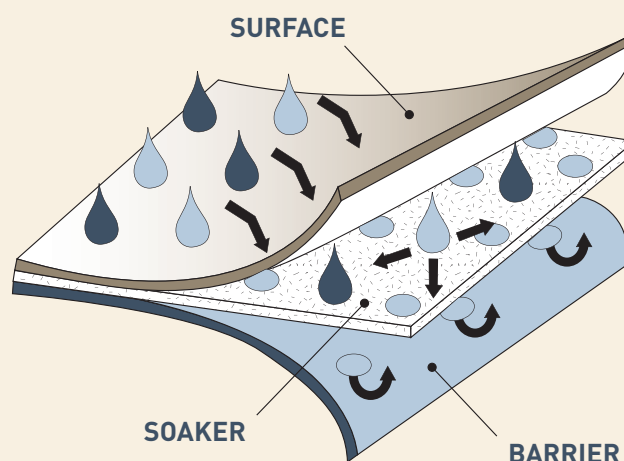

Features of the DermaCare Patient Care Underpad

- Multi-layered composition allows air to circulate
- Virtually eliminates shrinkage
- Eliminates movement between layers
- Reduces pilling
- Lays completely flat without bunching
- Thin profile will not affect performance of pressure redistribution mattresses

The DermaCare Underpad

- Top of the line Patient Care reusable underpad
- Bonded ultra thin pad to help maximize patient care by lying flat to help prevent pressure ulcers
- Ultra lightweight at 14.1oz, DermaCare absorbs up to 4 times its own weight (1,500cc)
- Brushed backing to ensure no movement under the patient to prevent bunching which can lead to pressure ulcers
- Impermeable barrier offers excellent linen protections, eliminating the need for multiple layers and reducing soiled linen

CAT #	SIZE	FACING	SOAKER (POLY/RAYON)	CORNERS	BARRIER
50560-9026	33" x 35"	Light Green	65/35	Round	Light Blue

The Chamonix Bonded Underpad

- Bonded ultra light and thin pad to help maximize patient care by lying flat to help prevent pressure ulcers
- Stay-Dry surface and high absorbency protects patients and bed linens
- Stain resistant
- Therma-Shield Barrier
- Round corners are less susceptible to wear on the edges

CAT #	SIZE	FACING	SOAKER (POLY/RAYON)	CORNERS	BARRIER
50560-410B	34" x 36"	Light Green	65/35	Round	Dark Blue

The Chamonix Underpad

- Provides superior performance on the nursing floor and in the laundry
- Stay-Dry surface and high absorbency protects patients and bed linens
- Stain resistant
- Impermeable Therma-Shield Barrier
- Round corners with surface quilted to soaker in zigzag design are less susceptible to wear on the edges of pad

CAT #	SIZE	FACING	SOAKER (POLY/RAYON)	CORNERS	BARRIER
50560-410	34" x 36"	Light Green	65/35	Round	Gray w/Blue Stripes

The Meridian Underpad

- Stay-Dry surface and high absorbency protects patients and bed linens
- Specially constructed fibers channel fluids down into soaker
- Super absorbent inner soaker keeps patients and beds drier, longer
- Impermeable Therma-Shield Barrier
- Round corners are less susceptible to wear on the edges

CAT #	SIZE	FACING	SOAKER (POLY/RAYON)	CORNERS	BARRIER
50560-610	34" x 36"	Light Blue	65/35	Round	Gray w/Blue Stripes

The Bonded Sonoma Underpad

- Provides superior performance on the nursing floor and in the laundry
- Stay-Dry surface and high absorbency protects patients and bed linens
- Stain resistant
- Round corners with surface quilted to soaker in zigzag design are less susceptible to wear on the edges of pad

CAT #	SIZE	FACING	SOAKER (POLY/RAYON)	CORNERS	BARRIER

GLOBAL MANUFACTURING AND SOURCING

Encompass has assembled a key team of manufacturing and sourcing professionals with over 150 years of combined experience in global operations. Whether its high-tech knitting of anti-embolism stockings in Tennessee, or sourcing the latest woven and non-woven fibers and fabrics from around the world, team members are strategically located throughout the supply chain, allowing us to bring the best products we can to our customers.

In addition to our domestic manufacturing and warehousing, we operate in more than 20 countries around the world. Our long-term international partnerships result in providing you consistent product quality and reliable service at an unmatched value.

We've built a team of more than 700 dedicated professionals who specialize in all aspects of customer care including sales representatives, customer service representatives, clinical product and education resources and interior designers.
